Environmental Integrity Statement

Innovative Plastics, Inc., as an industry leader in the manufacture of extruded plastic sheets and laminates, has been developing, manufacturing and distributing innovative products for over 19 years. We take our role in environmental stewardship seriously and are committed to minimizing our environmental impact, while continuing to offer the highest quality products and services in the industry.

Innovative Plastics understands that our future business success depends on balancing economic, social and environmental objectives.

Today, more than ever before, we are acutely aware of our need to reduce, reuse and recycle as much as possible to minimize the negative impact on our environment.

We stand committed to producing materials in our New Bern, North Carolina manufacturing facility, with the safest and most environmentally conscious processes possible, and we continuously evaluating new ways to make all our products environmentally friendly for the good of our community and nation. We monitor, control, and continuously search for innovative ways to recycle.

Plastic products manufactured and supplied by Innovative Plastics, Inc. do contain pre-consumer and post-consumer recycled plastic when applicable and available. Innovative Plastics recycles plastic trim scrap when and where product specifications permit, averaging 20% in select products. Once a Innovative Plastics product is consumed, it may be recycled. We encourage our customers to explore recycling options with Innovative materials. In addition, the waste from the manufacturing processes can be reclaimed and Innovative does not landfill manufacturing waste materials. Innovative strategically operates in ethical, socially responsible and innovative ways that exemplify resource efficiency through the prudent use of materials and resources. We pro-actively strive for continuous improvement in our own performance wherever possible and practical. Our environmental guidelines seek to encompass the most current scientific, business and social environmental practices.
